

## **Grade VII parent Walk-in report**

Grade VII Suncity's virtual Parents' Walk-in was held on Friday, 29<sup>th</sup> January 2021. The theme of the Parent Walk-in was 'Role Reversal and Transversal learning'.

The walk-in began with an extremely warm and hearty welcome followed by a prayer and dance presentation based on this year's school theme- Vasudeiva Kutumbakam. The mesmerising performance was a portrayal of Peace being liberty in tranquillity. Peace comes from being able to contribute the best that we have, and all that we have, toward creating a world that supports everyone.

This followed a brief introduction about integrated learning, its importance & significance in the over-all development and growth of the students. **Integrated learning** means combining what **we learn** in the classroom, whether it's theory or techniques, with the solutions to real-world problems.

The first integrated presentation was by the English and the 3<sup>rd</sup> language team. Students enacted and recited a poem that conveys the importance of hard work and stresses the need for coming together as one (vasudhaiva kutumbakam) to overcome challenges. A recital of the translated version of the same poetry was presented by the students in their 3<sup>rd</sup> language.

The next presentation was by the science group. They showcased their integrated learning through demonstrations. They made turmeric indicator using household materials and using the concept of colour change in indicators, they made beautiful paintings. They carried out experiments to show that acids and bases conduct electricity. A demonstration of images formed with the help of concave mirror was carried out to understand why concave mirrors are used at the dentists or the salons. Dabbing into another stream of science, biology, was the demonstration and explanation of the functioning of the respiratory system and the stethoscope paired with the demonstration of a couple of yoga asanas and aerobics which stressed on the importance of physical education in building cardiovascular health & boost blood circulation among other health beneficial aspects. Following which was conversations and debates in Hindi on the topics- nature, progress and prosperity. The conclusion of which was displayed via the medium of an interesting Comic Strip through Art. The social science & ICT group showcased a systematic and brief presentation about history, culture and tradition through a webpage, followed by an exquisite tribal dance and display of tribal jewellery made out of waste. Using 3D paint software, the different layers of the tropical rainforest were explained. There was a demonstration by the math and music group to show that the circumference of a circle is always  $\pi$  times its diameter, irrespective of the size of the circle. The students then went on to perform a musical piece about the properties of a circle.

The event ended with an interactive quiz conducted by the students for the parents followed by the recital of the national anthem.

Glimpses of the event:

This is a great initiative and I must congratulate all children and teachers especially Priyanka ma'am for putting all this together using technology. It felt like we are in school itself and attending it physically. I really appreciate the hard work done behind it. Thanks once again for putting up such a wonderful flow.

Name of the Students	Parent's Feedback
Vihaan Sharma	The function was very well conducted and was very informative. Few concepts I also learnt from it. Thanks ma'am for such a great effort.
