SOCIAL SCIENCE & SPORTS WEEK 2021

VENUE	SUNCITY SCHOOL
MODE	VIRTUAL & ONCAMPUS
DURATION	13 th to 18 th November,2021

DETAILS:

The Social Science and Sports week started on 13th November officially but preparations had started much in advance on campus and virtually. The Social Science and Sports week saw a wide range of transdisciplinary and transversal activities performed by the students of Suncity School. Intertwining of social sciences and sports enabled students to better understand how the VUCA world functions and find more effective solutions.

To that effect, the week kick started with flying colours on Saturday with the virtual outing, wherein they learned about the key moments of COP 26 held in Glasgow. The students learned about the collaborative efforts being made across businesses, governments and society for seeking solutions for rapidly reducing global emissions and adapting to a warmer world. The outing told the students in detail how the world is coming together to adopt sustainability and how climate innovative initiatives will play a vital role in saving the planet. The virtual outing ended with an interactive and interesting worksheet.

Monday morning started with the Social Science and Sports week opening assembly, where our esteemed Director Mrs. Rupa Chakravarty officially inaugurated the Social Science and Sports week and what an exhilarating experience it was for the students as Rupa Ma'am told the students and teachers about her experience as the hockey team captain for her school and how she overcame bad sportsmanship by the other teams and worked hard through blood, sweat and tears to go on and win matches for her team. The assembly went on with short and quirky version of the classic Hare and Tortoise story which taught us that a good strategy is just as important if not more than any other factor. The assembly ended with the Suncity Premiere League which was a fun and interesting idea taking clues from the popular IPL, highlighting the need for students to analyse life situations from managerial perspective. These managerial lessons from IPL will help them in better decision making and understanding the game as a strategy and not just as a source of entertainment. Parth Wadhera, a former Sun Citizen and sports captain judged the teams on various criteria such as social construct, commercial viability and creativity.

Tuesday morning saw a plethora of activities planned and tailored according to students' needs and interests. Activities undertaken included

Grade 7

Identify the sports players and mark the states or the countries they belong to on a World map. Grade 8

Best out of Waste- Students to make Sports equipment from waste (for eg. Shuttle cock) Create any tribal sports equipment (using waste material)

Grade 9

Students to collect data on Olympics and they display this data on the 3D map in Excel. Grade 11 Teams from each section to create/ design an advertisement for their product / Service from the category allotted. On Wednesday, 17th November 2021, the inter-house Social Science and Sports QUIZ assembly was conducted for grades VII- XI where participants were given questions ranging from different topics that incorporated a blend of Sports and Social Sciences. There were separate rounds for each grade, consisting of a participant from each house (Pacific, Atlantic, Arctic and Indian). The quiz ended in a tie between Pacific and Atlantic House. This led to an intense tie-breaker round. After successfully answering the questions correctly Atlantic house emerged victorious and was crowned the winner by securing a total of 25 points. The quiz was truly an enriching experience for students and really put their knowledge to the test. The quote "you never lose, you only win or learn" held true for this quiz as all the participants went back gaining more knowledge.

Thursday, 18th November 2021, the culmination assembly of virtual Social Science and Sports Week was designed to showcase Life lessons from the Celebrities such as speech by Virtual guest Speaker, Keshav Gupta, Founder, entrepreneur and development expert of "DAIS" an organisation working globally towards youth empowerment and international centre for initiatives towards sustainable development. His words of wisdom infused in the students a determination and drive towards achieving SDGs which are also an integral part of our school curriculum. The speech was followed by a rejuvenating Yoga session by students of class XI demonstrating integration of accounting terminology through Yoga asanas.

The week saw closure in true National spirit with rendition of the National Anthem.

Glimpses of the Week:
