

## Language Policy

The Language Policy is based on Suncity School's language philosophy and outlines the goals for language teaching and learning. At Suncity School, we nurture a multilingual environment where the primary language of instruction is English. It is a working document which would be reviewed periodically, depending upon on the diversity within cohort. Implementation of the policy is the duty of all IBDP teachers under the guidance of the IBDP Coordinator and ultimately the International Academia Head. All teachers new to the programme will be given in-school training by the IBDP Coordinator as well as the online or face-to-face training they otherwise receive.

The International Baccalaureate requires every IB World School authorised to offer one or more of the three IB programmes to have a written language policy.

The language policy must therefore:

- recognise that, language is central to learning and all teachers are, in practice, language teachers who are responsible for facilitating communication
- outline how students are to learn at least one language in addition to their mother tongue
- describe how the development and maintenance of the mother tongue for all learners is to be supported
- ensure that there are practices in place to provide inclusion and equity of access to the IB programme(s) offered by the school for all learners
- describe how the language of the host country is to be promoted
- recognise that administrators, teachers, librarians, and other school staff will require professional development in the fields of language learning and teaching and on how to make sure the language policy becomes a working document
- consider what resources and practices are to be used to involve parents in planning their children's language profile and development
- consider other language needs of the community

### ***The pre-existing language learning environment at Suncity School***

At Suncity School language learning begins at the very youngest age. English is taught from grade Pre-Nursery in the EYP along with Hindi. As students move through the MYP and the senior years they continue to study English and Hindi as mother tongue languages and they choose one of Spanish or French as their third language from grade 5. Students starting the Diploma programme are expected to take English A as their first language and, French B, German B, Hindi B or Spanish B as their second language. Depending upon the individual linguistic capability and inclination, a student may also opt for an additional second language.

### ***The language background for students taking the IB Diploma at Suncity School***

Suncity School is located in Suncity Township, Gurgaon, India. As such it accepts predominantly native Hindi speaking students into its IB Diploma programme, but English is **practically** a mother tongue for most students and those that have studied at Suncity School have undertaken their education only in English. English for many of our native Hindi speakers is a “second” native language. Students begin formal studies of English in their first year at school aged 3 years and continue to study it throughout the following 15 years. Further, through popular media young Indians meet on a daily basis through the various forms of media a constant exposure to the English language which further enhances their skills in this language.

Amongst IB students at Suncity School, there are children of Hindi speaking families who have lived abroad and returned to India and have attended schools with English as the language of instruction. Also, there are students who have one Hindi parent and have lived in a bilingual home environment or grown up in an English-speaking country and undergone their education in English.

There are also a few, but growing number, of students who have arrived with their parents who work in India, who have experienced English as a language of instruction and who seek an IB Diploma education because of English being their previous language of instruction. We expect this type of enrolment to grow.

A growing number of Suncity students have aspirations to study abroad in an English-speaking environment.

### ***Language - philosophy into practice***

The language curriculum at Suncity School is grounded in the belief that language serves multiple purposes, both social and educational. Language allows people to communicate feelings, ideas, values, beliefs and knowledge. It is also a medium for involving individuals in the various communities of the modern world and provides a way to make sense of experience and to break down barriers that separate individuals in today’s society. Learning another language allows one to understand others - it is a statement of respect and of being accepting of other cultures and practices.

The study of language, be it mother tongue or vernacular, is seen as the development of a repertoire of essential strategies, processes, skills, knowledge and attitudes that will make it possible for all students to become life - long learners and to flourish in a world of rapid social, cultural and technological change. The study of languages at various levels promotes international understanding, reinforces cultural identity, contributes to personal growth, and allow for effective communication. It is important that students learn languages, learn through languages and learn about languages. Borrowing from the IB diction, a deliberate classroom practice should be adhered to by all subject teachers.

## ***Languages at SUNCITY SCHOOL – in practice***

### ***Preparation for IB – Cambridge IGCSE***

All students in Grades 9 and 10 study Hindi, English and another modern European language – chosen from French, German or Spanish during their studies for Cambridge IGCSE programme. Study of language is valued highly in India as it enhances its development and global recognition in a more globalised society.

The IB Diploma programme at Suncity School offers IB students a variety of language choices.

### ***Group 1 – Studies in Language and Literature***

Given that English is the official spoken language in India, we offer **English A Language & Literature** course both at HL or SL level for the growing group of native, or almost native, speakers of English. Further Hindi A ST will be available to students who wish to maintain their native language skills

Suncity takes into consideration the small number of students who speak neither Hindi nor English as their mother tongue by making available **School Supported Self Taught (SSST) language A** as an alternative. A language specialist who is appointed as SSST coordinator supports such students in their studies. An example might be Korean or Japanese, a language spoken by several Suncity School students interested in the IBDP.

### ***Group 2 – Language acquisition***

There are natural complements in group 2 (Language acquisition). Students choose a language profile of **French, German, Hindi, or Spanish**.

Suncity School may be required to offer other language options to students who cannot make a suitable choice among those languages on offer. An example of such is Spanish ab initio which may be taken using the Pamoja web site.
